## Inspection Report Forms

The inspection report forms are examples of what the DSPN Quality Assurance Representatives use to inspect Rest Area, Wayside/Seasonal, and Park & Ride Lots/ Historical Marker. These forms may be used as a reference tool or as a tool to inspect your own sites on a daily, weekly or monthly basis. A copy of these inspections will be sent to your work center within three days of an inspection. If you would like additional copies of an inspection, please contact the DSPN office. All inspections are entered into a computer database by DSPN. A summary of inspections done at each site will be sent to the appropriate work center on a periodic basis.

## Forms Sent To DSPN On A Monthly Basis

The following reports are used by DSPN staff in preparing reports required by WisDOT. Reports should be forwarded to DSPN at the end of each month--prior to the 15<sup>th</sup> of the following month. If you have any questions about any of the forms, please contact the DSPN office at 608/661.2917.

- 31.17 RAM Monthly Site Activity Reports: Project managers or site supervisors are required to provide a "brief description" of projects/work performed by their crew. Any activity or project, other-than the routine services provided under contract. Example: Replaced men's room roof turbine, contacted local well driller and met with him on-site to evaluate leaking pump housing. Also any possible repairs that can be planned for or future projects that need DOT/DSPN approval should be listed. The normal or routine services provided by crew do not need to be listed. Example: washed and waxed lobby floor, oiled hinges on all doors, policed walkways and lawn for litter, mowed and trimmed site.
- 31.18 RAM Monthly Water Meter Readings Form: Water meter readings should be recorded at Year-Round Sites on a daily basis. At the end of the month, the report should be sent to the DSPN office.
- 31.19 RAM LP Tank Readings Form (Daily / Weekly): It is required that the Year-Round Sites utilize one of the forms for checking on tank levels to ensure LP is always available to the heating system. Forms should be kept in an on-site file for 90 days before discarding.

Each site manager must determine which form will be utilized by relying on historical LP usage and good judgment.
